PROFESSIONAL EXPERIENCE

Notre Dame University (NDU), Zouk Mosbeh, Lebanon *Sep. 2014 – present*
Department of Civil and Environmental Engineering
Assistant Professor

Duke University, Durham, NC, USA *summer 2014*
Department of Mechanical Engineering and Materials Science
Postdoctoral Research Fellow – M.I.T.'s Soft Active Materials Laboratory

Duke University, Durham, NC, USA *spring 2014*
Department of Civil and Environmental Engineering
Visiting Assistant Professor

Duke University, Durham, NC, USA *2010 – 2013*
Department of Civil and Environmental Engineering
Research Assistant – Structural Dynamics Laboratory

ARTELIA Engineering, Paris, France *2006 – 2013*
Divison of Transport and Infrastructure, Subdivision of Bridges
Bridge Engineering Project Manager

THALES Engineering and Consulting, Paris, France *2005 – 2006*
Divison of Transport and Infrastructure, Subdivision of Bridges
Principal Bridge Design Engineer

SECOA Engineering, Paris, France *2003 – 2005*
Bridge Design Engineer

EDUCATION

Duke University, Durham, NC, USA *Dec. 2013*
Department of Civil and Environmental Engineering
Ph.D. in Materials, Structures and Geosystems (GPA 4.0)
Dissertation title: "Modeling of Nonlinear Viscoelastic Solids with Damage Induced Anisotropy, Dissipative Rolling Contact Mechanics, and Synergistic Structural Composites."

Centre des Hautes Études de la Construction, Paris, France *June 2003*
Department of Reinforced and Prestressed Concrete
Post-Graduate Degree in Structural Engineering (GPA 4.0).

Université Saint-Joseph, Mar-Roukoz, Lebanon *June 2002*
Faculty of Engineering - École Supérieure d'Ingénieurs de Beyrouth
French course of study equivalent to:
M.S. in Civil Engineering - Infrastructure and Transport (GPA 4.0).

Université Saint-Joseph, Mar-Roukoz, Lebanon *June 2000*
Faculty of Engineering - École Supérieure d'Ingénieurs de Beyrouth
French course of study equivalent to:
B.S. in Civil and Environmental Engineering (GPA 4.0).

PROFESSIONAL
TRAINING AND
INTERNSHIPS

ARTELIA Engineering , Paris, France <i>Training</i> "Design, planning and execution of road earthworks."	<i>Jan. 27–29, 2009</i>
ARTELIA Engineering , Paris, France <i>Training</i> "Water act: classified facilities with respect to environmental protection."	<i>May 23, 2008</i>
CREDEF (research, study, diagnostic and training center) , Paris, France <i>Training</i> "Project management in the context of public procurement."	<i>June 11–13, 2007</i>
École Nationale des Ponts et Chaussées , Paris, France, <i>Training</i> "Eurocodes (European building codes) #3 and 4: design of metallic and composite structures; Application to bridges."	<i>Dec. 11–13, 2006</i>
École Nationale des Ponts et Chaussées , Paris, France, <i>Training</i> "Eurocodes (European building codes) #2: design of reinforced and prestressed concrete structures; Application to bridges."	<i>Oct. 2–4, 2006</i>
École Nationale des Ponts et Chaussées , Paris, France, <i>Training</i> "Eurocodes (European building codes) #2: design of reinforced and prestressed concrete structures; Application to bridges."	<i>Sept. 28–30, 2004</i>
Dar Al-Handasah Consultants , Beyrouth, Lebanon, <i>Internship</i> Structural design work on the Dubai Airport project.	<i>Summer 2001</i>
École Supérieure d'Ingénieurs de Beyrouth , Mar Roukoz, Lebanon, <i>Training</i> On-site training on the operation of advanced topographic equipments.	<i>Summer 1999</i>

TEACHING
EXPERIENCE

CEN 202 - Statics <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Fall 2014 – present</i>
CEN 203 - Mechanics of Materials <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Fall 2014 – present</i>
CEN 311 - Structures II <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Fall 2015 – present</i>
CEN 489 - Approved Professional Training <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Summer 2015 – present</i>
CEN 598 - Engineering Design I <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Fall 2014 – present</i>

CEN 599 - Engineering Design II <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Spring 2015 – present</i>
CEN 600/407 - Advances Mechanics of Materials <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Spring 2016 – present</i>
CEN 606/580 - Finite Element Methods <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Fall 2014 – present</i>
CEN 611/524 - Prestressed Concrete <i>Notre Dame University (NDU), Zouk Mosbeh, Lebanon</i> Instructor.	<i>Spring 2017 – present</i>
EGR 201L - Mechanics of Solids <i>Duke University, Durham, NC, USA</i> Instructor.	<i>Spring 2014</i>
Uncertainty, Design, and Optimization <i>Duke University, Durham, NC, USA</i> Graduate Teaching Assistant: conducted weekly recitation classes and office hours; supervised student's projects; graded homework assignments.	<i>Spring 2012</i>
Mechanics of Solids <i>Duke University, Durham, NC, USA</i> Graduate Teaching Assistant: conducted weekly recitation classes and office hours; supervised lab experiments; graded homework assignments and lab reports.	<i>Fall 2012</i>
Advanced Theory and Design of Reinforced and Prestressed Concrete Structures <i>ARTELIA, THALES, Paris, France</i> Conducted graduate level lectures and practiced individual coaching of recent graduates in civil and structural engineering working on the design of reinforced concrete structures.	<i>2005-2010</i>
Bridge Design <i>ARTELIA, THALES, Paris, France</i> Conducted graduate level lectures and practiced individual coaching of recent graduates in civil and structural engineering working on the design of concrete bridges, steel bridges and composite bridges.	<i>2005-2010</i>

RESEARCH
EXPERIENCE

Duke University, Durham, NC, USA <i>Research Assistantship</i> My research activity focuses on developing and applying new viscoelastic materials, and material models, to engineering structures. Topics addressed in my doctoral research include:	<i>2010 - 2013</i>
<ul style="list-style-type: none"> • the unified constitutive modeling of rubber-like materials by means of a new, three dimensional, behavioral characterization in finite strain, valid in a broad range of loading conditions, such as cyclic loading, monotonic loading (including at high strain rates), and damage, • the constitutive modeling of the Mullins effect induced anisotropy in elastomers, • the three-dimensional dynamic modeling of incompressible, compressible isotropic, transversely isotropic and fully orthotropic viscoelastic layers of arbitrary thickness, and of plane and spherical shape, by means of new boundary element formulations, • the solving of steady-state frictional rolling and sliding contact problems, in two and three dimensions, using novel moving-contact algorithms, • the application of the above-mentioned modeling techniques and solving strategies to the rolling resistance of rigid cylinders and spheres on viscoelastic layers, and to the rolling resistance of rigid spheres with viscoelastic coatings, 	

- the elaboration of simplified and highly cost-efficient computational approaches to viscoelastic rolling resistance,
- the design of a new experimental setup to explore the influence of material nonlinearities on rolling resistance,
- the study of composite structural members involving mechanical synergies between material components resulting in improved structural behaviors and mechanical performances.

ARTELIA, THALES, Paris, France

2005 - 2010

Project-Embedded Research Activity

Professional engineering projects included research activities such as developing new materials, designing experiments, and fitting and validating new models. Several research proposals were submitted and resulted in official research funding in the form of tax reductions. Examples of project-embedded research tasks include:

- developing a new fire protection system for extradossed prestressing tendons meeting severe specification requirements,
- developing a new formulation of polypropylene fibered concrete meeting specific requirements in terms of fire resistance and resistance to blasting.

IRISA - INRIA, reserach unit of Rennes, Rennes, France,

Summer 2000

Research Internship

Implemented a new object animation module in C++, based on the laws of continuum mechanics and strength of materials, and integrated this module into an existing software platform under Unix.

RELEVANT
GRADUATE
COURSE WORK

Mathematical Modeling	Advanced T&D ¹ of Reinforced Concrete
Linear System Theory	Advanced T&D ¹ of Prestressed Concrete
Risk and Reliability Analysis	Analysis and Design of Composite Structures
Uncertainty Quantification	Civil and Industrial Steel Construction
Numerical Analysis	Structural Analysis
Scientific Computing	Plates and Shells
Finite Element Method	Theory of Inelastic Structures
Nonlinear Finite Element Analysis	Analysis and Design of Building Structures
Continuum Mechanics	Advanced Design of Bridges
Mechanics of Soft Materials	Dams
Fluid Mechanics	Special Works and Structures
Hydraulics	Underground Works and Tunneling
Intermediate Dynamics	Linear Infrastructures and Road Design
Advanced Structural Dynamics	General Construction Methods
Earthquake Structural Engineering	Industrialized Constructions
Geology	Sea and Air Transport
Topography	Urban Transport
Soil and Rock Mechanics	Quality Management in Construction
Environmental and Geotechnical Engineering	Management and Planning of Large Scale Projects
A&D of Foundations and Retaining Structures	Marketing and Communication
Environmental Impact Assessment	General and Analytical Accounting
Academic Writing	Financial Management of Firms

¹ Theory and Design

HONORS AND
AWARDS

Received the Senol Utku Award for the best pre-Ph.D. peer-reviewed journal paper from Duke University, 2014.

Received a travel award to attend the 12th U.S. National Congress on Computational Mechanics held in Raleigh, NC, July 22-25, 2013.

Received the highest ranking graduate award from *Centre des Hautes Etudes de la Construction* and from *Centre d'Information sur le Ciment et ses Applications*, Paris, France, June 2003.

Graduated with the highest distinction in Infrastructure and Transport from *École Supérieure d'Ingénieurs de Beyrouth*, Mar Roukoz, Lebanon, June 2002.

Received the highest ranking graduate award from *Université Saint-Joseph*, Mar Roukoz, Lebanon, June 2002.

PRESENTATIONS
AND SEMINARS

"Novel approaches to modeling viscoelastic materials and components; Rolling resistance; Synergistic structural composites," Florida Atlantic University, Boca Raton, Florida, USA, May 13, 2014.

"Novel approaches to modeling viscoelastic materials and components; Rolling resistance; Synergistic structural composites," Notre Dame University, Louaize, Lebanon, April 14, 2014 (by video conference).

"Novel approaches to modeling viscoelastic materials and components; Rolling resistance; Synergistic structural composites," The Catholic University of America, Washington DC, USA, February 19, 2014.

"Novel approaches to modeling viscoelastic materials and components; Rolling resistance; Synergistic structural composites," North Carolina State University, Raleigh, North Carolina, February 6, 2014.

"Novel approaches to modeling viscoelastic materials and components; Rolling resistance; Synergistic structural composites," University of Ottawa, Ottawa, Canada, January 24, 2014.

"Novel approaches to modeling viscoelastic materials and components; Rolling resistance; Synergistic structural composites," Clarkson University, Potsdam, New York, USA, December 9, 2013.

"Novel approaches to modeling viscoelastic materials and components; Rolling resistance; Synergistic structural composites," University of Colorado, Boulder, Colorado, USA, December 2, 2013.

"Combining the extradosed post-tensioning technique with the balanced segmental cantilever construction method," Lebanese University, Faculty of Engineering II, Ain Saadeh, Lebanon, January 21, 2010.

"Exceptional bridge crossing the Trois Bassins ravine on the French Réunion island: design and construction methodology," Université Saint-Joseph, Faculty of Engineering, Department of Civil and Environmental Engineering, Mar Roukoz, Lebanon, February 18, 2010.

"Polypropylene fibered concrete tunnel on the RN314 in La Défense: resistance to fire and blasting," Centre des Hautes Etudes de la Construction, Paris, France, February 2, 2008.

"Types of prestressing in bridge construction: a brief review," Centre des Hautes Etudes de la Construction, Paris, France, April 4, 2007.

"Bridge design and construction: update on the French expertise," UBIFRANCE, the French Agency for International Business Development, Paris, France, November 9, 2006.

"Combining longitudinal and transverse phasing in prestressed concrete bridges," COTEBA Engineering, Paris, France, October 27, 2006.

PROFESSIONAL
MEMBERSHIP

Structural Engineer registered at the Lebanese Order of Engineers and Architects (ID# 26306).

Member of the American Society of Civil Engineers (ASCE).

SERVICE

Reviewer for the following archival journals: International Journal of Solids and Structures, Computational Materials Science, Journal of Applied Mechanics (ASME), Journal of Tribology (ASME).

Curriculum Committee of the Department of Civil and Env. Engineering *Fall 2014 – present*
Notre Dame University (NDU), Zouk Mosbeh, Lebanon
Member.

Graduate Committee of the Department of Civil and Env. Engineering *Spring 2015*
Notre Dame University (NDU), Zouk Mosbeh, Lebanon
Member.

Strategic Plan Committee of the Department of Civil and Env. Engineering *Spring 2015 – present*
Notre Dame University (NDU), Zouk Mosbeh, Lebanon
Member.

IT Committee of the Faculty of Engineering *Spring 2015 – present*
Notre Dame University (NDU), Zouk Mosbeh, Lebanon
Member and Chair.

Graduate Committee of the Faculty of Engineering *Fall 2015 – present*
Notre Dame University (NDU), Zouk Mosbeh, Lebanon
Member and Secretary.

Organizing Committee of the 3rd International ACTEA16 Conference *Summer 2016*
Notre Dame University (NDU), Zouk Mosbeh, Lebanon
Member of the Finance subcommittee.

COMPUTER
SKILLS

Computer Languages: C, C++, VBA, HTML and basics in JavaScript.

Computer Programs: Matlab, Mathematica, Maple, Abaqus, Ansys, SAP, L^AT_EX, Microsoft Office Suite, Microsoft Project, Primavera, OpenOffice Suite, AutoCad.

French Structural and Finite Element Programs: ST1, PCP, CDS, OMC, OM3, NEOP, Robot Millennium, Pylostab.
